

Amir Ali Jiwani

Software Craftsman

A software enthusiast.

I have been working as a developer for around a decade. During this time, I have got a chance to visit various domains and technologies -- Which helped in shaping my self on how I think and work now.

I like to create software and helping other developers like me around. Recently have gained interest in making more layman talks than the development intensive, as I believe everyone attached to a concept should have a right to understand it in complete and concise way.

Some recent technologies I have been working are NodeJS, React, Docker, Kubernetes, Electron and other of such kind. My main focus is towards the problem solving, irrespective of the platform.

Work **Software Engineering Manager**

SEEK · Solving the problem of connecting the right candidate to the needful hirers

Feb 2020 – Mar 2021

Kuala Lumpur, Malaysia

SEEK is a diverse group of companies that have a unified purpose to help people live more fulfilling and productive working lives and help organisations succeed.

- Contributed to SEEKs overall product & technology strategy and aligning systems with that strategy.
- Ensured that systems are fit for purpose, well architected and follow current SEEK development practices.
- Maintained platform health, by ensuring that our systems are secure, reliable, resilient and cost effective.
- Drove customer focus to ensure that we are delivering great outcomes for our customers.

- Commenced and maintained a high performing team culture that values collaboration, learning and continual improvement.
- Acted as an enabler; Growing the technical skills and leadership capabilities of my team through coaching and mentoring. This involves having 1:1s with my team mates.
- Lead by example; Which required me to get my hands dirty when the need is there.
- Unblocked the team with what ever it took, having the complete ownership in the matters of maintaining healthy teams.
- Celebrated successes and learnt from the failures; And propagated the culture through the teams and exemplified it for the rest of the organization.
- Paired with the Principal Engineer of the team, to understand the climate and the problems of the team.
- Participated in and retroed the core hiring process through centralized hiring squad in the organization.
- Helped the org, to move fast to the eco system of global products; Away from the local products which we were dealing with since past 25+ years

Lead Software Architect

SEEK · Solving the problem of connecting the right candidate to the needful hirers

May 2018 – Jan 2020

Kuala Lumpur, Malaysia

SEEK is a diverse group of companies that have a unified purpose to help people live more fulfilling and productive working lives and help organisations succeed.

- Been the catalyst for transforming the organization.
- Performed the duties as the JavaScript coach for the organization.
- Advocated for, and implemented software best practices.
- Been the communicator for various teams to maintain their health; Some times preached the organization values.
- Participated as a core in hiring new and experienced talents.
- Propagated automation as a culture rather an option.
- Moved legacy code and data to cloud via lift & shift, green field and brown field methodologies.
- Performed the duties of deciding and validating sensible defaults for the organization.
- Pushed cloud first approach in the org, living in an environment of Infra ops.

Senior Software Engineer (Full-Stack)

Exact · Cloud business software for SMEs and their accountants

Oct 2016 – Jan 2018

Kuala Lumpur, Malaysia

We are Exact. We make smart business software. We are entrepreneurial and

to be exact. We make smart business software for entrepreneurs and dream big, just like you. We help and encourage anyone we work with to always be the best version of themselves.

- Helped to come up with an end-to-end pipeline to build and release the product.
- Performed various tasks including coding, building, testing, releasing and debugging the product.
- Made massive use of automation, including development and in release cycles.
- Helped to produce tools that are helpful during the lifecycle of the product. Usually as a need to support the product.
- Helped POC the product initially with our customers to set up our product owner for the success of the product.

Senior Software Engineer

Hexosys · Albaloo is a fast growing location based advertising platform, consists of Mobile App, Web Portal, Social Media Fan Pages and 3rd Party Advertising Partners.

Nov 2015 – Oct 2016

Kuala Lumpur, Malaysia

Accomplishing more than 150 main products as cutting-edge technology protocol/bus analyzers, reveals great ability of HexoSys to delivering new projects within the field of expertise with complete maturity and high competitive to the global high-tech market.

- Helped in complete overhaul and rewriting parts of the Albaloo product.
- Added the ability of targetting users through multi communication channels (SMS, emails, mobile notifications etc).
- Helped product with identifying with and implementing the ability of geo fencing the ads in the current platform.
- Introduced a custom framework on top of Laravel's current implementation to support custom JavaScript loading in the layout.
- Initialized and laid the basis for automation in the project; Through simplifying and making some tedious task, process oriented.

Chief Technology Officer

Pi-Labs · A service provider for various kinds of software needs to our clients.

Jun 2010 – Feb 2014

Karachi, Pakistan

Our passion for mobile software and our ability to deliver engaging solutions has given us much acclaim. Early adoption of Windows Phone 7 meant we were one of the first companies globally to have delivered an app to the Microsoft Marketplace, yet our expertise encompasses the breadth of the smartphone ecosystems including iOS, Android and Palm's WebOS.

- This was my earliest position as a technical leader and I myself were going through a major learning.
- Helped organization with various service based projects. Dealt with various

- Helped organization with various services based project, Death with various platforms and technologies.
- Created, architected and maintained a home grown idea that later shifted to become Garfield's official game, known as Feed Garfield. The internal project name was Candy Pot. It was a team effort.
- Created, architected and maintained an idea in collaboration with our partner. It was a video and audio processing app; These were early days when snapchat didn't exist; The project was named Gulf Talk.
- Worked on an aggregator banking solution known as Mobank for UK based banks. Clients were able to control their various accounts through this app.
- Pioneered the space of Windows 8 initial launching apps for Microsoft Singapore; Some of them were CNA, DBS Bank Singapore, The Straits Times Singapore
- Worked on various 2d and 3d games.
- Used and improved Cocos2dx platform to flourish 2d games on cross platform technologies.
- Written several frameworks my self and opensourced it later to help the community; To mention some: EasyNDK-for-cocos2dx, Easy-CURL-for-PHP
- Gelled along with various individual contributors to help organization meet its financial goal and beyond.
- Presented learnings and findings at various university events and global technology events.
